

Ethernet Connect

With access options to suit all business sizes, ethernet is the technology of choice for flexible, scalable, highly reliable and great value WAN connectivity.

Data services are constantly evolving as organisations optimise application performance across multiple locations. With BT Ethernet Connect Ireland, you can manage the complexity easily with a transparent and cost-effective service that lets you aggregate bandwidth and tailor connectivity to specific business needs.

Wholesale Ethernet Connect is an uncontended and symmetrical service, guaranteeing speed in both directions. It's the best option for extending corporate networks over a WAN and provides a highly scalable solution that's easy to manage. It can also be used by service providers for their own network or resold to customers.

Why choose BT Ireland?

Superior support

Our Dublin network management centre provides 24x7x365 support, with a focus on proactive interventions to resolve incidents before they impact you.

National reach

We're Europe's largest telecoms services wholesaler by revenue and market share, and the second largest fixed line wholesaler in Ireland, serving over 50 operators. Our optical network reaches across Ireland, with connectivity to the UK and beyond.

Secure and compliant

Using highly secure carrier components and standards-based products, we ensure the highest levels of security around your sensitive data.

Features and benefits of Ethernet Connect

Multi-service access

BT Ethernet Connect Ireland supports private line national / international, MPLS, SIP Trunking, IP line services and Cloud Connect. It can be scaled and adjusted to meet your changing requirements.

Resilient

We offer a choice of diverse access options, with high levels of service availability guaranteed.

Prioritise traffic

We differentiate and prioritise critical traffic like voice and video by splitting source traffic into a number of separate service classes, each with its own high quality service targets.

High speeds

We offer speed options from 512Kbps to 10Gbps as standard, with the option of escalating speeds all the way up to 100Gbps, to meet your customers ever-growing needs.

To find out more, contact us by phone: 1800 924 929 or through [our online customer enquiry form](#).

Technical checklist

Multiple bandwidth options:
512kbps to 100Gbps.

Multiple VLAN capabilities.

High availability:
99.99% minimum.

Optimal latency:
maximum one way of 10ms.
